6 Sep: CPHIMS Exam • 7-9 Sep: Conference & Exhibition •
10 Sep: Masterclasses & Hospital Tour
Marina Bay Sands, Singapore

An Update on the Philippine Health Information Exchange (PHIE) for Improved Healthcare Outcomes

An Update on the Philippine Health Information Exchange (PHIE) for Improved Healthcare Outcomes

- ✓ Serves as guide in formulating policies and implementing development programs
- ✓ Enables us to work systematically to give the Filipino people a better chance of finally finding their way out of poverty, inequality, and the poor state of human development

National Objectives for Health

- ✓ Provides guidance in attaining the three strategic goals of the DOH for the health sector: ensuring financial risk protection, access to quality health facilities and attainment of the health-related Millennium Development Goals – most significant of which is the reduction in Infant and Maternal Mortality Rates and incidence of infectious diseases such as TB, HIV-AIDS, Malaria

National Plans

- ✓ Serves as guide in formulating policies and implementation programs

Health Support Systems

Establish harmonized, quality, relevant and responsive e-health services to provide the necessary tools, data, information and knowledge for evidence-based policy and program development towards the provision of accessible, quality, affordable, efficient and safe health services and attainment of better health outcomes for all Filipinos

National Objectives for Health

Mortality rates and incidence of infectious diseases such as TB, HIV-AIDS, Malaria
